Yes.

Why were you endorsed by [Calgary's Future](#) and [Look Forward](#)?

Early on in the campaign I created a detailed platform page that highlights a desire to improve public transit, tackle climate change. I was offered interviews and questionnaires with both PACs (political action committees). I agreed to these because I believe in my message and the positive transformation it could bring Calgary. I know both groups spoke with other candidates as well and I was their choice.

I realize I am benefitting from a system but I will continue to advocate for change to that system to continue to level the playing field for candidates. [I wrote about PACs and endorsements in a blog post.](#)
